

Environmental Policy Statement

PD Fire Protection Ltd

Our statement of general environmental policy is

The understanding of the need for Environmental Protection forms an integral part of the PD Fire Protection business philosophy. We are committed to protecting the environment and believe that the Company has a responsibility not to compromise the ability of future generations to sustain their needs. The impact that any of our activities, those of our clients/contractors, may have on the environment is an area of concern.

We will seek to reduce our consumption of non-renewable resources, and whenever practicable will select materials which have the least negative impact on the environment throughout their life cycle.

Environmental Protection will have equal status to considerations for Health, Safety and Production Quality.

In confirming our commitment to protection of the environment we will treat environmental regulations that apply to our activities as minimum standards and where appropriate aim to better them. We will provide information to the subcontractors, customers and end users of our services to ensure that misuse will not be the cause of damage to the environment.

Responsibility for the Environmental Policy and supporting statement lies with the Directors. The environmental Policy will be brought to the attention of all employees and will be renewed annually to assess its effectiveness, compliance with environmental law and that it reflects changing needs and circumstances.

Whilst recognising the fundamental responsibility of the Company and its employees for environmental protection, particular attention will be paid to the following areas:

Waste Management –waste will be kept to a minimum, compatible with the best trade practices. Only licensed waste contractors will be used to dispose of project waste materials. Sub Contractors will be encouraged to apply the principles of this policy but shall be required to comply with the minimum relevant legislation.

Flora and Fauna in and around Project Locations

Every effort shall be made to minimise the effects of the Company activity on the flora and fauna within and around the project site. Specific tender stage checks shall be carried out to establish site specific conditions and the presence of any protected and or at risk species.

Recycling – whenever possible materials will be purchased from suppliers who obtain products from replaceable sources.

Noise/Dust- will be suppressed, where practical, to ensure that no nuisance is caused to neighbouring establishments or the general public.

Conservation of Energy – The site managers shall introduce and monitor efficient and economic use of energy in the form of lighting and heating.

Training - all relevant company employees shall be aware of objectives of this policy and the contribution expected from them. Employees with high risk tasks shall be trained in the environmental aspects associated with their tasks.

Legislative Compliance - regular operational assessments shall be carried out to ensure compliance with the legislation and the best available practice in environmental protection.

All employees are to consider themselves equally responsible for complying with the Environmental Policy and are encouraged to suggest improvements to this end.

Signed

P Doherty
Director
